

Enterprise in Education

Beacon for teachers is an exciting event that inspires both enterprise and team building

- The event is built around the Beacon Challenges, a highly charged business start-up simulation which has been mapped to the curriculum
- Teams compete against each other to come-up with an innovative business idea that they must then pitch in the “Dragons’ Den”
- Participants can network in the business world as the facilitators and “dragons” are real business people
- Everyone leaves with a clear definition of enterprise that will help inspire activity across the curriculum
